

Nicolas COTTEZ-ABRATE

Engineering Student — Data & Artificial Intelligence

Final-year internship · 6 months · January 2027

+33 6 71 88 04 35 · nicolascottezabrate@gmail.com · nicolascottez.vercel.app · LinkedIn · GitHub

Fifth-year engineering student at ECE, specialising in Data & AI in a fully English-taught programme. Experience in local RAG, document processing, internal tool development and data analysis.

EDUCATION

ECE — Graduate School of Engineering, Paris / Lyon

2022 — 2027

General Engineering Degree — International Major in Data and Artificial Intelligence · Minor in Quantum Physics

France

Programme fully taught in English

- Fifth year of a five-year engineering programme, following two preparatory years in Lyon.
- Data science, machine learning, business intelligence, advanced databases and systems.

Warsaw University of Technology

2024 — 2025

Exchange semester in artificial intelligence and computer science

Poland

Institution du Sacré-Cœur, La Ville-du-Bois

2015 — 2022

French Baccalaureate — Specialisations in Mathematics and Physics

France

EXPERIENCE

Antenic, Paris

Apr. 2026 — Aug. 2026

R&D Intern — Data and Artificial Intelligence

France

- Designed a local AI copilot for internal procedure search, field-note structuring and assistance with report drafting.
- Built a document knowledge base with semantic retrieval, source citations and missing-information detection.
- Contributed to the internal application and created an activity-monitoring dashboard using Python and SQL.

FORVIA Group, Brières-les-Scellés

Jul. 2025 — Aug. 2025

Engineering Intern — Electronics R&D

France

- Managed electronic component libraries, created 3D models and contributed to PCB routing with Design Force (Zuken CR-8000).

SIMERIS, Lyon

Jan. 2024 — Feb. 2024

Engineering Intern — Industrial Process Optimisation

France

- Improved industrial processes using the 5S method, designed 3D tooling and maintained internal production databases.

Seasonal jobs — La Poste, Public Finance Centre and Carrefour

2023 — 2025

Seasonal Employee — 6 months total

PROJECTS

PromptCare — Medical Record Summarisation Assistant

Team-built medical-record summarisation assistant. Functional prototype combining TF-IDF retrieval, cosine similarity and source-grounded extractive summarisation, tested on fictitious records.

Python · scikit-learn · TF-IDF · NLP

BankLens — Bank Statement PDF Processor

Transaction extraction and classification, confidence scoring and interactive dashboards.

Python · PyMuPDF · Pandas · Streamlit

Universal RAG System

Modular architecture for document ingestion, semantic retrieval and document-grounded answer generation.

Python · LangChain

TECHNICAL SKILLS

Programming

Python, SQL · familiar with Java, C, JavaScript and TypeScript

Data & AI

Pandas, NumPy, scikit-learn, PyTorch, TensorFlow, NLP, RAG

Local AI & backend

Ollama, FastAPI, LangChain, ChromaDB, Streamlit

Data & tools

PostgreSQL, Docker, Git, Linux, Jupyter, Power BI, n8n

LANGUAGES, ENGAGEMENT & INTERESTS

Languages

Fluent English — TOEFL iBT 89, TOEIC 900 · Native French · Spanish A2 · Japanese A1 · Chinese (basic)

Extracurricular engagement

Vice-President, "Les Caves" — student events

International experience

Academic exchange in Poland and language immersion in the United States

Sports

Boxing and climbing
